#### THE HUMAN-ANIMAL BOND

ANNE PERKINS, PH.D.

LEIF HALBERG, M.A.

#### Mission & Goals

The Human-Animal Bond Program explores the unique relationship between humans and animals. By increasing our knowledge about this bond and by assessing how animals enrich our lives, we can improve the quality of life for both humans and animals. Carroll College's unique experiential approach provides students with both scientific and academic rigor and the hands-on application of the knowledge gained.

The HAB Program explores the unique relationships between humans and animals and teaches students the role of animals in service and therapy. Students learn a bio-psycho-social approach to understanding the role animals play in our lives, and study the benefits and changes in both humans and animals as a result of interactions and targeted training methods. Also covered are the ways physical disabilities, cognitive functioning, emotional states and family/community dynamics affect the bonding process.

The primary goals and objectives of the program are to train generalists who have a sound foundation in technical skills (economics and foreign languages) as well as in the theory and history of International Relations.
