INTRODUCTION

The idiom “it goes without saying” comes to mind when one sits down to write an introduction for a booklet of this kind. It is tempting to begin, for instance, by acknowledging it goes without saying that Carroll’s faculty are dedicated, caring, productive, and smart. It is likewise reasonable to assert that it goes without saying that their work with our students and their service to their academic societies helps to steer and power the college. Yet sometimes, despite what is widely known and well understood, it is best to say the obvious and to celebrate the extra and the extraordinary undertakings of a group of individuals such as this one. This is most certainly one of those times.

This publication offers a wonderful snapshot of the faculty’s scholarly activities, each of which represents months, years, and, in some instances, decades of dedication. As a whole, the list of publications and artistic productions underscores the amazing range of interests and expertise of our faculty, which this year alone has published on everything from “Commutative Schur Rings” to “Existential Temptation,” and from the “human-dog relationship” to “The Mystery of the Butte Sinkhole.”

This booklet also provides an accounting of the impressive number places faculty visited when participating in conferences and forums, and it enumerates a long list of grants won this past academic year (over 25 total), underlining in this regard the resourceful nature of our teacher-scholars. And while some of the grants are significant and highly competitive and some smaller and easier to obtain, each is equally valuable for the ways it allows our professors time and funds needed to expand their scholarship and their network and, by extension, the experiences of Carroll’s students.

What this booklet does not and, perhaps, cannot capture are the many and profound accomplishments of our faculty that occur on the margins, with and for their students. Those instances when students need more time, more understanding, more challenge, more feedback, or more or less of anything else not listed on the course syllabus, the faculty provide what is beyond necessary. They thus enable the success of our students as rising professionals and their growth as individuals.

Finally, it goes without saying that this brochure and many of the remarkable undertakings delineated here would not be possible without the support and dedication of the Faculty Development Committee. To them and to all to others at Carroll who made this year and these accomplishments possible, I offer my sincerest thanks and deepest gratitude.

Colin Irvine, Ph.D., Class of 1991

SENIOR VICE PRESIDENT FOR ACADEMIC AFFAIRS AND DEAN OF THE COLLEGE
Faculty Spotlights

MARIA BROSNAN, M.S.
Rush University of Chicago, Chicago, IL (Associate Professor of Nursing, 2006)

Associate Professor Maria Brosnan earned her Masters of Science in Nursing with a focus as an Acute Care Nurse Practitioner (ACNP) in 1998 from Rush University in Chicago. After completing her ACNP certification in 1999, she became a Cardiology Nurse Practitioner at Rush Presbyterian–St. Luke’s Hospital in Chicago, Illinois, where she remained until 2001. In 2002, Maria moved to Montana to fulfill a life-long dream to work and serve on the Blackfeet Indian Reservation, where she worked as a dialysis nurse and taught as an adjunct instructor at the Blackfeet Community College, which began a love of teaching. After being a Clinical Resource Nurse Educator at St. Peter’s Hospital in Helena, Maria joined the Carroll community as an Assistant Professor of Nursing in 2006.

Maria’s experiences as a critical care nurse and as an Acute Care Nurse Practitioner provide a solid foundation for teaching in her specialty of acute nursing care as well as for teaching patient simulation in the Nursing Simulation Lab. Her varied clinical and teaching experiences provide opportunities to share “real-life” clinical situations with her students to help them prepare for their upcoming career in healthcare. Her philosophy of nursing is based on caring for clients in a holistic manner to include interventions to heal the body, mind and spirit. It is her goal to foster in her students an appreciation of holistic care of their patients in all settings, including critical-care and emergency settings.
Maria has a keen interest in encouraging student to actively engage in their learning. In 2012, Maria “flipped” her first course and due to its overwhelming success, she has continued to flip her other major courses. She has integrated the use of video lectures for students and utilizes class time for the application of the content. She enjoys asking the question, “how can I help students learn best?” By integrating technology in her courses, she has noticed that student performance has significantly improved.

Maria enjoys integrating complementary and alternative therapies in her teaching. Most recently, she has partnered with one of her nursing colleagues, Kim Garrison, MSN, RN, to teach a new course, Integrative Healing. This course is aimed at exposing students to a variety of complementary and alternative therapies, such as massage, relaxation techniques, meditation, prayer, etc., so that students can learn how these therapies may be used in combination with traditional medicine to aid in healing patients in body, mind and spirit.

Additionally, her experience living and working on the Blackfeet reservation has provided an appreciation of the unique cultural needs of patients and therefore, she attempts to share with her students the importance of honoring the cultural and spiritual needs of their patients and how this is integral to healing. Recently, Maria taught the course American Indian Perspectives in Health and Illness which integrated both didactic and experiential learning strategies to explore the foundational beliefs/experiences common among American Indians and how these may impact health and wellness.

Maria shares that, “Being a professor at Carroll College has been an amazing and rewarding experience. The students at Carroll challenge me to be a better teacher, nurse and human being. Each day I am impressed by their enthusiasm, insights, and questions. I am excited each year to witness their growth from semester to semester and I am inspired by their accomplishments as graduates. It is so rewarding to hear from a graduate that what we did in the nursing simulation lab was so applicable to their clinical position and how prepared they felt for their first job.”
D.J. CASH, Ph.D.
Boston University, Boston, MA (Associate Professor of History, 2013)

Dr. Dane (D.J.) Cash received his Ph.D. in History from Boston University in 2012. His research focuses on the intersection of American foreign policy and political culture, specifically regarding the Korean War of 1950-53. Of particular importance to Dr. Cash’s research is the role the Korean War and its attendant debates played in shaping the modern American conservative movement (sometimes referred to as the “New Right”), which was still in its infancy during the Korean War and is typically thought to have arrived at maturity with the first issue of William F. Buckley’s National Review in 1955. Dr. Cash’s recent publications include articles and book chapters entitled, “History Has Begun a New Chapter: American Political Opinion Journals and the Outbreak of the Korean War” and “The Evil Soil of Poverty and Strife: Similarities and Differences Between the Bush Doctrine and Truman Doctrine.” He is currently working on a book manuscript, tentatively titled, Cauldron of Conservatism: The Korean War and the Making of the New Right.

Cash notes, “Since my youth, I have developed a love for history, especially the fields of American political history and the history of American foreign relations. I love sharing this passion with students and helping them view history not as a bunch of boring facts to be memorized but as a contested story full of human drama that continues to unfold into the present. The reason I most enjoy teaching at Carroll is that both students and faculty seem genuinely committed to an honest intellectual and/or spiritual pursuit of the truth, and I am honored to play a small part in helping them cultivate their abilities as they discover new things about the world and themselves in traveling this lifelong journey.”

Provided a meal and toiletry kit for the Family Promise Program (May, 2016).  
Traveled to Wise, Virginia, with Carroll student and recipient of the Newman Civic Fellow award, Kimberly Johnson. We visited a mobile medical clinic, which has been a national model for providing health services for rural communities. This trip resulted in a new partnership that we hope to continue into the future—and hopefully create a mobile clinic for rural communities near Helena one day.  
I taught a gross anatomy lab for the WWAMI program at Montana State University in April of 2016. This was pivotal in creating a new line of communication and sharing between the WWAMI program at MSU and the A&P program at Carroll College.  
I created and delivered an anatomy update course for local physical therapists where I brought them into the anatomy lab and reviewed pertinent anatomy with them. They really wanted a “refresher” course in gross anatomy and this was a big opportunity for them to review using the real thing.
