Mission Statement
of Carroll College
&
Mission, Goals & Student Learning Outcomes
of the Nursing Department

Carroll College Mission Statement

Founded in 1909 by Bishop John Carroll, Carroll College is a Catholic, diocesan, liberal arts college in the ecumenical tradition of the Second Vatican Council. It advances its mission by fulfilling the following objectives.

Instilling an enduring wonder for knowledge that will prepare students for leadership and their chosen vocations

As a liberal art school, Carroll College acknowledges the practical role of preparing its students for a career, but it also affirms the traditional role of providing for the expansion of the intellectual, imaginative, and social awareness of its students. It is dedicated to providing for its students the means for their full realization of a dual goal of vocation and enlightenment. Thus, while providing substantial professional and pre-professional programs, the College encourages and expects all students to participate in a broad spectrum of academic disciplines.

Offering an integrative and value-centered education rooted in freedom of inquiry

As an academic community, Carroll College affirms its commitment to the principle of freedom of inquiry in the process of investigating, understanding, critically reflecting upon, and finally judging reality and truth in all fields of human knowledge. As value-oriented, Carroll College is committed to and deeply involved in the further dimension of free deliberation and decision-making regarding values and personal commitment. Each student at Carroll, through personal and institutional means, is exposed to value systems with which one can readily identify, including secular values such as the worth of work and the use of the intellect, humanistic values centering on the uniqueness and dignity of the person, and religious and moral values concerned with one's relationship to God, self, and others.

Engaging faithfully the intellectual tradition and the teachings of the Catholic Church

As a Catholic college, Carroll is obligated to treat judgments concerning ultimate reality and decisions concerning ultimate value at both an academic and a pastoral level. This obligation involves the College's relationship to the Magisterium of the Catholic Church, defined as “the perennial, authentic, and infallible teaching office committed to the Apostles by Christ and now possessed and exercised by their legitimate successors, the college of bishops in union with the pope.” Carroll College is committed to present faithfully within its curriculum the magisterial teachings of the Catholic Church. At the same time, it acknowledges the special role of the theologian, who--although not a part of the authoritative teaching body of the Church--makes available to the Magisterium his or her scientific competence, while acting as a mediator between religion and culture by carrying on an academic dialogue with philosophy, science, the liberal arts, the believing community, and secular society.

Serving all with humility, especially our neighbors who are poor and marginalized

As a college founded by and related to the Diocese of Helena, Carroll has a special obligation to provide for the spiritual needs of the college community. At the same time, the resources of the College's Theology Department, and campus ministry organization are available for the special religious needs of the diocesan community as a whole. Moreover, Carroll College rededicates its spiritual, academic, and social resources to the service of the citizens of Montana, its home, and to the worldwide human family through continuing efforts to guarantee to individuals, to groups, and especially to the marginalized the right to life, to personal and social dignity, and to equality of opportunity in all aspects of human activity.
Welcoming all persons of good will in a cooperative journey toward truth and virtue

In the ecumenical tradition of the Second Vatican Council, Carroll College is committed to a policy of open participation by members of all religious faiths and all persons of good will in the total academic and spiritual experience of the college community. While standing fast by the teaching of the Catholic Church, and avoiding a false conciliatory approach foreign to the true spirit of ecumenism, Carroll College welcomes in love and respect the full participation of other Christians and non-Christians in an ecumenical dialogue and in a truly humble and charitable joint venture in the common search for the Ultimate Truth and the Ultimate Good which is the final goal of all education.

Officially adopted by the Carroll College Board of Trustees May 26, 1978

New format officially adopted by the Carroll College Board of Trustees November 7, 2014
Carroll College Department of Nursing

MISSION

Inspired by the mission of our College, we are dedicated to preparing professional nurse generalists who promote excellence in holistic care. As community leaders, our graduates are critical thinkers, change agents, compassionate and skilled caregivers, as well as lifelong learners. Our graduates serve Montana, our region and the world.

(Last amended 5/11)

GOALS

The Department of Nursing prepares its graduates to enter into the practice of professional nursing with a framework of knowledge integrated from the sciences, arts and humanities. Emphasis is placed on the delivery of holistic nursing care which recognizes the dignity and uniqueness of every person. Completion of the major provides the foundation for life-long learning and graduate study in nursing.

The Faculty of the Department of Nursing seeks distinction in teaching, nursing scholarship and clinical expertise, for planning, directing, implementing, and evaluating the curriculum.

(Last amended 8/10)

STUDENT LEARNING OUTCOMES

A graduate of the Department of Nursing will pass the NCLEX-RN licensure examination and enter into the profession of nursing with the following abilities:

1. Integrate knowledge from the sciences, arts and humanities into nursing practice.
2. Critique basic organizational and systems leadership for patient safety and quality care.
3. Utilize theory, research and evidence-based practice to optimize health and well-being.
4. Utilize information management systems and patient care technology.
5. Participate in changing social, political, financial, policy, and regulatory environments that affect nursing and the health care system.
6. Demonstrate excellence in communication, including interprofessional communication and collaboration for improving patient health outcomes.
7. Provide health promotion and disease prevention interventions to individuals, families, groups, communities or populations in diverse settings.
8. Assume personal accountability for professionalism and professional values.
9. Uphold the standards of nursing practice as defined by the Montana Nurse Practice Act and the ANA Code of Ethics.
10. Demonstrate Baccalaureate holistic generalist nursing practice across the lifespan.

**Total Credits = 124**

▲ CORE – One course needed in each of the following areas: Fine Arts, History, Literature, Philosophy (in addition to PHIL 107 or PHIL 208), and Theology (in addition to TH 101). Of these courses, will need one course designated as Global Diversity and one course designated as Writing Intensive outside the nursing major. It is the student’s responsibility to make sure that 122 credits are completed in order to graduate.

* Writing Intensive course for the major
○ National Diversity course
▼ Nursing students are expected to purchase Carroll College nursing scrubs and other items needed for clinical/lab experience.
Major in Nursing
The nursing program at Carroll College offers a baccalaureate degree with a major in nursing, preparing students to practice as professional nurses or for graduate studies in nursing. Upon graduation, students are eligible to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN). Successful passage of the NCLEX-RN is required for practice as a registered nurse. The Montana Board of Nursing makes all final decisions on issuance of RN licenses in Montana. The baccalaureate degree in nursing at Carroll College is accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu/ccne-accreditation). The program is also approved by the Montana State Board of Nursing.

Baccalaureate Nursing
A baccalaureate degree in nursing represents a comprehensive, holistic approach to the delivery of health care for individuals, families, and both local and global communities. Baccalaureate nurses utilize evidence-based practice models as they assess and plan care for the physical, emotional, social, and spiritual needs of their clients. Proficient in nursing skills, leadership skills and health systems assessment, the Carroll nursing graduate is well-prepared to function as a generalist practitioner.

Admission to the Nursing Major

**Direct Entry into the Nursing Major** *(available for students admitted to Carroll in fall of 2016 and after):*
Students are accepted into the major with acceptance into the college and no additional application process is required. Nursing majors enroll in the pre-licensure BSN curriculum beginning the first college semester. Direct entry students must meet all the progression criteria to maintain their placement in the nursing major. *(see criteria for Progression in the Nursing Major)*

Students who wish to be considered for direct entry into the nursing major must meet the following criteria:
1. Minimum 3.30 GPA
2. Minimum composite ACT score of 24 or new SAT score of 1190 (Math and Combined Reading and Writing)
3. Completion of 1 year of Chemistry by the 6th semester
4. Completion of 1 year of Biology by the 6th semester
5. Completion of mathematics through Intermediate Algebra (Algebra II) by the 6th semester
6. Submission and completion of application (receipt of all supporting credentials) by November 1st listing Nursing as the first major of interest

*Please note:* not all candidates meeting the minimum eligibility criteria will be selected for the Direct Entry option.

**Pre-nursing Admission into the Nursing Major:**
Students admitted into the pre-nursing licensure curriculum will have the opportunity to apply to the nursing major during their first year at Carroll. Pre-nursing students must be formally accepted to the nursing major in order to register for nursing courses. Applications for Admission to the nursing major are accepted in the spring semester each year for admission into the major the following fall semester. All students who currently have listed Pre-Nursing as their major will receive notification regarding the admission process via Carroll College email. Final decisions regarding admission to the nursing major will be made after grades from the spring semester are available. Spring grades are posted by the Friday after graduation and students will have until the following Friday to notify the nursing department and/or Registrar of any grade changes. Please note that if there are more applications than spaces available, a Priority Ranking System will be used (see below for details).

Students seeking admission into the nursing major must meet the following criteria:
1. Be admitted to Carroll College as a degree-seeking student.
2. Complete or be enrolled in the following pre-requisites with a “C-” or better at the time of application: BI 201, BI 202, CH 111, CO 101, ENWR 102, PSY 105, PSY 203.
3. BI 201, BI 202, CH 111, CH 112, and BI 214 (or the equivalent of these courses) must have been completed within 5 years of admission to the nursing program at Carroll College. Any of these courses, taken prior to the five-year limit, may be analyzed by the nursing department for possible use depending on individual circumstances.
4. Have an overall college career Grade Point Average of 3.0 or higher on a 4-point scale. (This includes all attempted credits at an accredited college or university.)
5. Repeat or withdraw from no more than two (2) courses considered pre-requisite to nursing or nursing courses taken either at Carroll or other institutions.

6. Complete all required course work, to include independent study or “incompletes”, by established deadlines.

7. Complete criminal background check as instructed by the Department of Nursing, to be paid by the student. Students with background checks that reveal a record will be evaluated individually to determine whether they will be admitted to the nursing major. Alcohol and drug violations may interfere with Montana Board of Nursing approval to sit for the NCLEX-RN exam.

8. Provide documentation of freedom from communicable tuberculosis and immunity to hepatitis B, and measles, mumps, and rubella (MMR).

9. Students with an academic integrity violation on file at Carroll College will be evaluated individually to determine whether they will be admitted to the nursing major.

Please note: meeting the minimum requirements does not guarantee admission to the nursing program.

The Carroll College Department of Nursing has a primary responsibility to the education of future professional nurses – a responsibility seriously recognized by the Admissions Committee, charged with selection of those candidates who best demonstrate the academic achievement, emotional maturity, integrity, and motivation necessary for consideration for admission.

The Department of Nursing reserves the right to accept for admission into the major the number of students for whom a quality educational program can be provided and in order to fulfill the accreditation guidelines mandated by the Commission on Collegiate Nursing Education. If there are more applications than spaces available, the Department will use a Priority Ranking System based on the following criteria to select students for admission. Criteria will be applied after spring grades become available.

1. Successful completion of items 1-9 above.
2. Overall college career Grade Point Average (this includes all attempted credits at an accredited college or university).
3. Selected GPA from the following Carroll courses: BI 201, BI 202, CH 111, CO 101, ENWR 102, PSY 105, PSY 203. A course from another institution must be accepted at Carroll as an equivalent course to be calculated in this selected GPA.
4. Completion of CORE or nursing prerequisites without need for repeating courses (no D’s or F’s) or withdrawals.
5. Current enrollment and the number of credits completed at Carroll College. Students who have completed 24 or more Carroll credits by the end of the spring semester will be ranked higher on this criteria than students who have completed at least 12 Carroll credits.
6. No academic integrity violation on file in the Registrar’s Office at Carroll College.
7. A standardized exam to measure aptitude for nursing success, to be paid by the student, may also be required.
8. Interviews by the Department of Nursing faculty may be required.

Progression in the Nursing Major
To progress in the nursing major, the student must:
1. Have a grade of “C-” or better in all nursing classes and the following co-requisites: BI 214, CH 112, MA 207, PHIL 107 or PHIL 208, SO 101. All nursing courses must be taken at Carroll College unless the nursing department grants an exception. Direct Entry nursing students must also have a “C-” or better in all nursing pre-requisites (BI 201, BI 202, CH 111, CO 101, ENWR 102, PSY 105, PSY 203) to maintain their placement in the nursing major.
2. Maintain a minimum CUM Carroll GPA of 2.75 at the end of each semester after admission into the nursing major.
3. Pass/Fail grades may be acceptable for courses not co-requisite to nursing courses as long as the student is within the parameters of the guidelines of the Academic Policies as stated in the Carroll College Catalog currently in effect.
4. In the event of a college academic integrity violation, the student’s ability to progress in the nursing major will be determined on an individual basis.
5. Students who receive any legal action that would appear on a criminal background check, such as a misdemeanor or felony charge or conviction, must immediately inform the chair of the Nursing Department, and will be evaluated individually to determine whether they will be allowed to progress in the nursing major.
6. Students must demonstrate the academic achievement, emotional maturity, integrity, and motivation necessary for progression in the nursing major.
If the student does not meet the above criteria, he or she is not eligible to continue in the nursing major.
Policy related to Student Withdrawal and Re-application/Re-entry to the Nursing Major is found in the Department of Nursing Student Handbook.

Access to Clinical Experiences
Clinical experience begins in the 200-level nursing courses and occurs in diverse community settings, varying from Helena’s hospitals to public health, assisted-living, long-term care, home visits, and psychiatric and school settings. Although nursing clinical is primarily in Helena, out of town clinical may be required, necessitating personal transportation. In addition, on-campus clinical experiences are provided in the on-campus nursing clinical simulation center. Each nursing course at Carroll provides quality, personalized learning experiences.

Nursing students are expected to purchase Carroll College nursing scrubs, nametag, hand-held mobile device, and other items needed for clinical/lab experience. As part of the application process and prior to beginning 200-level courses, nursing students must show proof of freedom from communicable tuberculosis and immunity to hepatitis B, varicella, and measles, mumps, and rubella (MMR). Students are required to have current American Heart Association Basic Life Support for Healthcare Providers certification prior to beginning clinical and must update this CPR certification as required. Students must update their TB test annually and obtain an annual flu vaccination as required.

Professional nursing is regulated in Montana by the Board of Nursing to protect the health, safety, and welfare of the public. As part of their educational program, student nurses are entrusted with the responsibility of providing certain kinds of nursing care to clients/patients. It is the responsibility of the faculty to determine that the student nurse has demonstrated reasonable competence to render nursing interventions without risk to the client/patient. If the faculty member’s evaluation of the student nurse’s behavior or health status indicated that he or she is likely to provide unsafe nursing care as outlined in the course expectations, the Statutes and Rules of Nursing, and the ANA Code of Ethics, the faculty has the legal responsibility to deny the student nurse access to clinical learning experience. Professional liability insurance coverage is required for students engaged in clinical experiences and is included in registration fees.

The Carroll College Department of Nursing reserves the right to make changes in these admission and progression criteria.
The four dimension assessment guide is designed to help students gather comprehensive data about the client for which care is given. It is meant to serve only as a guide to holistic assessment. In each situation, the student must decide what information is the most pertinent to the client. In some instances some of the information on this guide may not be appropriate to gather while other information not on the guide may be very important.

As one of the goals of being a professional nurse is to be a critical thinker, the student must evaluate and tailor the assessment based on the client profile and needs. It is expected that students will consult with their instructor and review the literature related to the client in order to develop a comprehensive and pertinent assessment tool for each individual client.

I. PHYSIOLOGICAL DIMENSION - That dimension of a person concerned with interrelated functions of cells, tissues, organs, and systems.

A. IMMUNE/DEFENSE MECHANISMS

1. Age specific variations of growth and development
   a. Immunization status – appropriate for age, health status and occupation
   b. Bathing and hygiene capabilities.
   c. Elderly more prone to impaired skin integrity.

2. Health History and subjective data
   a. Assess for risk of infection by collecting data regarding immobility, age, nutritional status, physical and emotional stressors, certain medical therapies, medications, immunization history and disease processes.
      - Subjective data that may indicate presence of infection are loss of appetite, nausea, loss of energy, chemotherapy, headache or other signs associated with a specific body system (ex: urinary frequency or sore throat).
   b. Assess hygiene practices (bathing times, use of hygienic products, and cosmetics), self care abilities (functional level and types of assistance needed for skin care), and
   c. Presence of past or current skin problems such as allergies. Rashes, itching and description of aggravating or alleviating factors.
   d. Foot care and nail care practices and problems.

3. Physical examination and objective data
   a. Signs and symptoms of infection vary according to body area involved. Generally skin and mucous membranes are involved with local signs of swelling, redness, tenderness with palpation or movement, heat and loss of function at site. Assess for skin integrity (use Braden scale), skin color and texture, lesions or wounds, drainage and hygiene status.
   b. Signs of systemic infection: fever, increased pulse and respiration, malaise, nausea, anorexia, enlarged or tender lymph nodes that drain the area of infection.
   c. Lab values and diagnostics: increased WBC, differential (CBC) ESR, urine, blood, sputum or other drainage cultures.

4. Medication history and complementary therapies – Does client take any over the counter or prescription medications or herbs for colds and nasal stuffiness, antibiotics, antipyretics, analgesics or chemotherapy? If so, note dosages, times taken, results and side effects.

B. MOBILITY/ACTIVITY

1. Age specific variations of growth and development (ex: examine spine in school age children).
   Fine and motor skills refined in 1-5 year age group, 6-12 years continue with refinement of fine
and motor skills. Develop exercise patterns for later life. Bone density and muscle tone decrease with aging.

2. Factors affecting body alignment and activity level and mobility:
   a. Health problems (past or current physical or mental health problems that affect muscle strength and endurance – heart disease, lung disease, stroke, musculoskeletal or neurological problems, trauma or pain.
   b. Environmental factors – stairs, assistive devices, safety concerns that impede mobility and exercise.
   c. Financial factors – adequate finances for equipment and aids that enhance mobility.

3. Health history and subjective data
   a. Obtain an activity and exercise tolerance history – What activities make you tired? Do you experience dizziness, dyspnea, increased respiration rate or other problems following activity? What type of exercise, frequency and length of exercise session?
   b. Any previous trauma or changes in functional abilities
   c. Symptoms of pain, weakness, stiffness, swelling, fatigue, spasms, unsteady gait
   d. Daily activity level – able to carry out ADL’s independently such as eating, dressing, bathing, toileting, ambulating, use of wheelchair or special equipment, transfer, cooking, shopping and home maintenance.
   e. Factors affecting mobility or safety concerns

4. Objective information and physical exam
   a. Inspection for posture and gait for alignment, ease of movement, symmetry of body parts, balance, coordination
   b. Palpate for muscle swelling or atrophy, deformities of bones, joints, increased warmth, tenderness
   c. Range of motion
   d. Muscle strength and mass
   e. Activity tolerance

5. Medication and complementary therapy history, anti-inflammatory medications, analgesics, steroids, or anti-arthritic gout medications.

C. FLUID & ELECTROLYTE BALANCE/HYDRATION

1. Growth and development considerations
   a. Expected intake and output for age
   b. Drinks via; breast, bottle, training cup, regular glass, uses straw

2. Subjective information and past history
   a. History of illnesses which alter fluid and electrolyte balance:
      • Examples: renal failure, congestive heart failure, diabetes insipidus, acute GI, GU infections or fever
      • Symptoms: polydipsia, polyuria, vomiting, diarrhea, dry mouth, dry eyes

3. Objective information and physical examination data
   a. Ability to request or access fluids independently
   b. Status of skin turgor, mucous membranes, presence of edema, weight pattern
   c. Intake and output record

4. Lab values
   a. Blood: Electrolytes, BUN, Creatinine
   b. Urine: Creatinine Clearance, Specific Gravity

5. Medication and Complementary therapy history
   a. Diuretics
b. Electrolyte supplements
c. Other drugs impacting fluid and electrolyte status positively or negatively

D. CARDIOPULMONARY/OXYGENATION

1. Age specific variation of growth and development.
   - Respiratory and pulse rates are highest and most variable in newborns
   - Respiratory rate of neonate is 40-80 breaths/minute. Preschool = 25 breaths/minute. Adolescent and adult 12-18 breaths/minute. Infants use diaphragmatic breathing.
   - Heart rate of neonate 120-160 beats/minute. 80-150 beats/minute in infancy and childhood. Irregular heart rate common in infants and young children.
   - Blood pressure 90/55 by one month, gradual rise to 120/80 for adults, hypertension during middle adulthood is a major risk factor.

2. Lifestyle and risk factors – smoking, alcohol use, exercise and activity pattern, history of cancer, CVD and TB, obesity, diet high in fat, sugar, salt, caffeine.

3. Health history and subjective data
   a. Current or past respiratory problems
      1) colds, croup, asthma, allergies, TB, pneumonia, bronchitis, emphysema – frequency, duration and treatment.
      2) Exposure to pollutants, smoking
      3) Presence of cough – describe
      4) Description of sputum
      5) Use of oxygen at home
   b. Current or past cardiovascular problems
      1) High blood pressure
      2) History of heart disease such as angina, heart attack or heart failure, rheumatic fever, endocarditis, pericarditis. If so, when.
      3) Presence of chest pain- describe location, pain with breathing or activity, duration, other symptoms (nausea, SOB, light headedness) what activities precipitate pain and what relieves the pain
      4) Any peripheral vascular disease – calf pain with walking and what relieves it.
      5) Do your feet and ankles swell or feel very cold, numb or tingling
      6) Do you become extremely fatigued with activity
      7) Any problems with anemia

4. Physical exam and objective data – Radial and apical pulse, BP, respiration rate and depth, heart sounds and apical impulse, lung sounds, skin color, cyanosis, use of accessory muscles, nasal flaring, pursed lip breathing, quality of peripheral pulses, and peripheral edema.

5. Lab values and diagnostics – O₂ saturation, Hgb, Hct, RBC’s, cholesterol, ABG’s, angiogram, chest x-ray, EKG.

6. Medication history – do you take any over the counter or prescription medications for heart, blood pressure or breathing? If so, which ones and what are dosages, times taken and results, including side effects.

E. GASTROINTESTINAL/NUTRITION

1. Growth and Developmental considerations
   a. Feeds self; independently, with assistance, or totally dependent
   b. Diet and calories appropriate for age
   c. Assistive devices used for eating

2. Subjective information and past history
   a. Request/preferences/restrictions
b. Religious, cultural, or personal food practices
c. Specific likes or dislikes
d. Food allergies, or intolerance

3. Objective information and physical exam
   a. General appearance related to nutritional status
   b. Height and weight (actual and ideal)
   c. Method of receiving nutrients: eating, tube feeding, gastrostomy tube, PPN OR TPN
   d. Swallowing assessment and chewing ability
   e. Status of teeth
   f. Current diet order
   g. % of food eaten at meals
   h. Abdominal assessment including bowel sounds

4. Lab values
   a. hgb and hct
   b. total protein
   c. serum albumin
   d. cholesterol

5. Medication and Complementary therapy history
   a. appetite stimulants
   b. antiemetics
   c. antacids
   d. medications that may interfere with digestion and absorption of nutrients

F. ENDOCRINE METABOLISM

1. Growth and Development considerations
   a. Expected growth for age according to growth chart

2. Subjective Information and history
   a. History of endocrine or metabolic illness surgery or congenital defects including thyroid, parathyroid, pituitary, liver (cirrhosis, hepatitis, gall bladder) pancreas (pancreatitis, diabetes mellitus)
   b. Symptoms: polydipsia, polyuria, heat or cold intolerance, fatigue, rapid pulse

3. Objective Information and physical exam
   a. Vital signs (in relationship to endocrine condition)
   b. Presence of enlarged or atrophied thyroid or liver

4. Lab Values
   a. Blood glucose
   b. Thyroid function
   c. Liver function

5. Medication and Complementary therapy history
   a. anti-diabetes medications
   b. pancreatic enzymes
   c. thyroid supplements
   d. steroids
   e. medications for cirrhosis, hepatitis
   f. other related drugs

G. ELIMINATION

1. Growth and development
   a. status of toilet training
b. words used to specify need to toilet
c. diaper size
d. type of toilet used

2. Subjective information and history
   a. usual elimination pattern
   b. symptoms related to elimination: pain or discomfort on urination or defecation, nocturia, hematuria, abdominal pain, constipation/diarrhea, incontinence (specify type of known)

3. Objective information and physical exam
   a. toilets independently or with assistance
   b. presence of incontinence
   c. character quality and quantity of urine and stool
   d. presence of catheter (specify type) urostomy, colostomy, ileostomy and if self care or assisted care

4. Lab values
   a. urine analysis or culture
   b. stool cultures, guiac

5. Medication and complementary therapy history
   a. drugs or therapies to treat or prevent urinary tract infections or incontinence
   b. drugs or therapies to prevent or treat constipation or diarrhea

H. NEUROLOGICAL/LEVEL OF CONSCIOUSNESS

1. Age specific considerations of growth and development
   a. Effects of congenital disorders or trauma on development
   b. Nervous system continues to develop during childhood years

2. Health history and subjective data
   a. Current or past problems with:
      • Trauma of head or spine
      • Headaches or dizziness
      • Lack of coordination, tremors, weakness, seizures, fevers
      • Change in sensation, numbness, weakness
      • Speech changes
      • Swallowing difficulty
      • Pain experience
      • Drowsiness
      • Anxiety and fear

3. Physical exam and objective information
   a. Mental status for cerebral function
      • Level of consciousness – arousability, ability to speak and follow directions, alert, stuporous, unresponsive
      • Awareness – orientation x 3, perceptual deficits
      • Thought processes – problem solving, concentration, memory, judgement
      • Communication
   b. Cranial nerves – can be assessed with sensory for symmetry of pupils and response to light
   c. Motor function
      • Muscle size and tone – strength of hand grips
      • Gross motor function – watch gait, balance with head-to-toe walk, Romberg
      • Fine motor coordination – rapid alternating movements
      • Obvious defects
e. Reflexes – deep tendon and superficial – assess for symmetry and briskness

4. Diagnostics – CT, MRI, lumbar puncture

5. Medication history – do you take any over the counter or prescription medications for convulsions, tremors, tranquilizers, anti-vertigo drugs, antidepressants, analgesics, antipyretics, narcotic analgesics, barbiturates, sedatives? If so, which ones, what dosages, times taken and results, including side effects.

I. SENSORY FUNCTION

1. Growth and Development
   a. expected visual and auditory acuity and considerations for age

2. Subjective information and history
   a. symptoms related to sensory function: eye strain, double vision, diplopia etc, tinnitus, decreased acuity, dizziness, vertigo, decreased sensation in extremities, or extra sensation such as numbness and tingling, altered sense of taste or smell
   b. past eye or ear surgery
   c. past or current eye or ear problems/diseases

3. Objective information and physical exam
   a. hearing and visual acuity
   b. tympanic membrane
   c. PERRLA
   d. Use of contact lenses, glasses, hearing aids, artificial eyes, prosthetic devices for communicating via phone, television, computer etc.
   e. Speech pattern, clarity and vocabulary
   f. Sensation of extremities

4. Lab values
   a. Nothing specific for sensory, may observe elevated CBC if infection present in ears or eyes

5. Medication and Complementary therapy history
   a. identify medications whose side effects may alter sense of taste, or smell or may cause tinnitus, visual disturbances
   b. medications or therapies to treat current eye or ear problems
   c. preventative therapies used for eye or ear health

J. REST/SLEEP

1. Age specific considerations

2. Factors affecting sleep – age, illness, environmental fatigue, lifestyle stress, alcohol and stimulants, diet, smoking, motivation

3. Sleep history – describe sleeping problems such as waking up during the night, sleeping more than usual, falling asleep in the middle of daytime activity, snoring, walking in sleep, apnea. Describe usual sleeping pattern, bedtime rituals, sleep environment, recent changes in sleeping pattern or difficulties in sleeping.

4. Examination and assessment – observation of facial appearance, behavior – energy level
   a. Subjective – complaints of fatigue, weakness, irritability, restlessness
   b. Objective – dark areas around eyes, puffy eyelids, red conjunctiva, limited facial expression, slumped posture, yawning, inattentive

5. Medication history – medications (sedatives, narcotics, caffeine, decongestants, bronchodilators, antidepressants, beta-blockers)
K. PAIN/COMFORT

1. Growth and development considerations
   a. Infant pain assessment – physiological and behavioral indicators
   b. Child pain assessment – pain rating scale, faces scale
   c. Cognitively impaired elderly assessment – pain rating scale with word anchors, faces scale

2. Subjective information and history
   a. History of painful experiences
   b. Ongoing pain problem
   c. Current pain
   d. Location of pain
   e. Pain intensity on a scale of 0-10
      • Now
      • Average
   f. Quality of pain
   g. Onset, duration, variation, rhythms
   h. What relieves pain
   i. Effects of pain on function, quality of life

3. Medication History (opioids, NSAIDS, acetaminophen, adjuvant analgesics) and Complementary Therapies

L. REPRODUCTIVE/SEXUALITY

1. Developmental changes and stage

2. Clients at risk – altered body structure or function due to trauma, obese, disfiguring conditions, value conflicts, lack of knowledge about sexual function and expression, risk factors for cancer

3. Health history
   a. Women – menstrual periods, pregnancies, breast self exams, breast or ovarian cancer in family and last pap test or mammogram, burning with urination
   b. Men – voiding difficulties or frequency, treatment of testicular or prostrate cancer, testicular self exams?, discharge
   c. Men and women – sexually active, protection from infection, history of STD’s, concerns about sexual health, sexual preference

4. Exam sequence – breasts, genitalia and rectum

5. Assessment data
   a. Subjective – age, menstrual status, painful urination
   b. Objective – masses, discharge, skin abnormalities (developmental stage), lesions

6. Medication history – drugs affecting sexual performance, hormones

II. PSYCHOLOGICAL DIMENSION - That dimension of a person concerned with mental processes and their effects on function.  *(Adapted from Taber, 2001)*

1. Social History: lifestyle and available social/emotional support

2. Stressors
   a. Level of stress (current life situation including major stressors experienced over the past year)
   b. Normal coping pattern
3. Neurovegetative changes
   a. Sleep pattern
   b. Appetite
   c. Energy level
   d. Sexual and bowel functioning

4. Insight: client’s understanding of illness, recognizes need for help, accepts responsibility for self

5. Self Concept
   a. Role Performance
   b. Body Image
   c. Self Esteem
   d. Personal Identity

6. Sense of Control

7. Issues with Loss, Grief

8. Erikson’s Stages of Psychosocial Development

9. Mental status
   a. Appearance
   b. Behavior/Activity
   c. Cooperation and Reliability
   d. Speech
   e. Affect and Mood
   f. Thought
      1) Thought Content
      2) Thought Process/Flow
   g. Perception
   h. Cognitive Functioning (mini mental)
      1) Orientation
      2) Concentration and Calculation
      3) Memory
      4) Judgment

10. Risk Assessment
    a. History of suicidal thoughts/attempts
    b. Suicidal ideation
    c. History of violent, aggressive behavior
    d. Homicidal ideation

11. History of prior or current psychiatric treatment
    a. What interventions have been tried so far
    b. What has helped/not helped
    c. What makes problems (symptoms) worse, better
    d. Medications: effectiveness and side effects

12. Alcohol/Drugs
    a. Amount, frequency, last use, problems associated with use
    b. History of CD treatment
    c. CAGE questionnaire
       Cut down
       Annoyed
       Guilty
       Eye opener
13. Strengths

III. **SOCIOCULTURAL DIMENSION** - “The learned, shared, and transmitted values, beliefs, norms, and lifeway practices of a particular group that guide thinking, decisions, and actions in patterned ways” (*Leininger, 1988, p. 158*). It includes family, social support network, roles, economic status and education.

1. Cultural affiliation
2. Beliefs about current illness
3. Health care practices
4. Illness beliefs and care practices
5. Family life and support systems
6. Roles: Family, social, work
7. Language
8. Level of Education

IV. **SPIRITUAL DIMENSION** - A component of health related to the essence of life; the vital principle in human beings which gives life to the physical organism in contrast to its purely material aspects; gives meaning to life; a unifying force within individuals, a common bond between people; an individual perception of faith. (*Hill & Smith 1990*)

1. Meaning and purpose in life
   a. What gives your life meaning and purpose?
   b. What makes you want to get out of bed every morning and do what you have to do?
   c. Do you feel that your life makes a difference? If so, in what ways?
   d. In what ways has your health or illness had an impact on your meaning and purpose?

2. Sources of strength and hope
   a. Who or what provides you with a source of strength right now?
   b. Who is the most important person in your life?
   c. Are people available to you when you are in need?

3. Concept of God or Higher Power
   a. Is religion or God important to you? If so, can you describe how?
   b. Do you use prayer in your life? If so, does prayer benefit you in any way?
   c. Do you believe God or a higher power is involved in your life? How?
   d. What is your God or higher power like?

4. Religious/spiritual practices
   a. Are your religious/spiritual beliefs helpful to you?
   b. Are there any religious/spiritual practices meaningful to you?
   c. Has your health or illness affected your religious/spiritual practices?
   d. In what ways do you carryout your religious/spiritual practices?
   e. Are any religious/spiritual books, symbols, services helpful for you now?
   f. How can we help you maintain or practice your religion/spirituality in this setting?
SECTION C

Student Governance & Organizations

C-1  Student Affairs Representatives
C-2  Carroll College Student Nurses’ Association
At the beginning of each fall semester, the sophomore, junior and senior classes will elect a Class Representative and Alternate to serve on the Nursing Department Student Affairs Committee. In the event that the class representative is unable to attend a scheduled meeting, they should notify the alternate to attend in their place. The elected representative (and alternate when needed) will serve as a liaison between their class and the nursing department faculty in addressing questions or suggestions regarding curriculum, collaborating on policies and projects affecting students, etc. In the interest of involving more students in this process of representation, students will serve no more than one year as Class Representative. The alternate can be elected to serve as Class Representative in a future year.

“When a student has questions concerning the conduct of classes or grading procedures (other than a final grade) the following procedural steps are to be followed: The student must attempt to resolve the matter with the individual instructor. If a mutually satisfactory resolution cannot be reached, the student should bring the concern to the chairperson of the particular department. If a satisfactory resolution is not reached at this level, the student should contact the Vice President for Academic Affairs for assistance in attempting to reach a resolution.” - from Carroll College Academic Grievance Policy
Although nursing is one of the fastest growing professions, a baccalaureate degree in nursing doesn’t necessarily guarantee employment. Due to an influx of “qualified applicants”, employers are now looking for prospective employees having involvement in pre-professional organizations. As a nursing student at Carroll College, CCSNA will provide you with information and the networking skills to reach your employment goals.

What is CCSNA?
CCSNA is our college chapter for the Montana Student Nurses’ Association (MSNA) and the National Student Nurses’ Association (NSNA). CCSNA brings students together helping further the growth of nursing in various ways, such as involving students with community projects and working together to gain awareness regarding a variety of healthcare issues.

Who can join CCSNA?
Membership is open to any student at Carroll College pursuing a nursing degree or any student interested in nursing as a career. Membership can occur anytime throughout the school year.

What are the benefits of joining CCSNA?
CCSNA is a great way to involve you with nursing through workshops and guest lecturers. It gives you the chance to meet with other nursing students at various levels in the program to learn what your coming years will include.

On the state and national levels there are more than $75,000 worth of scholarships awarded annually. Many nursing books and study tools are offered to members at a lower cost than non-member students. Attendance at state and national conventions allows you to have an active voice in the future of nursing. Insurance, credit cards, and product discounts are also offered as membership benefits.

What is the cost for membership in CCSNA?
CCSNA does not have an annual membership fee.

How do I join CCSNA?
Look for meeting times and membership information on the CCSNA bulletin Board or by email.

What activities does CCSNA do?
In the past, CCSNA has put on health fairs, blood pressure screenings, distributed snack sacks as a fundraiser, organized a variety of other community fundraisers, distributed health information to students and community members, attended state and national conventions and more!
SECTION D

Nursing Department
Faculty and Staff Roster
NURSING DEPARTMENT
FACULTY & STAFF ROSTER

Maria Brosnan, MSN, ACNP-BC
Assistant Professor, earned her Masters Degree in Nursing, specializing as an Acute Care Nurse Practitioner, at Rush University of Chicago.

When she is not teaching, Maria enjoys riding her horses, spending time with friends and being outdoors.

Courses taught: Fundamentals and Health Promotion, Assessment and Health Promotion, Pathophysiology & Pharmacology, Clinical Nursing Care, Capstone Clinical and NCLEX preparation

Rm. 405 SH, Office Phone: 447-4958, mbrosnan@carroll.edu

Stephanie Burkholder, MN, APRN, FNP-BC
Assistant professor, Stephanie was born and raised in Helena. She received her Bachelor of Science in Nursing from the University of Pennsylvania in Philadelphia and later received her Master of Nursing (Family Nurse Practitioner program) from Montana State University in Bozeman. Her nursing background includes pediatric inpatient care, public health nursing, and nurse case management.

When she is not teaching, Stephanie enjoys hiking, backpacking, camping, and exploring with her husband and two young daughters.

Courses taught: Assessment & Health Promotion, Evidence Based Practice Research Methods.

Rm. 407 SH, Office Phone: 447-5492, sburkholder@carroll.edu

Kim Garrison, MN, RN, CNE
Associate Professor, earned her masters in psychosocial nursing at the University of Washington and has been a certified Biofeedback Therapist since 1985.

Specialties include management of the stress response, biofeedback therapy, anxiety disorders, childhood trauma and client self management of health concerns.

Outside of class, Kim enjoys hiking, traveling, the outdoors and her family.

Courses taught: Psychosocial Health, Capstone Clinical

Rm. 409 SH, Office Phone: 447-5489, kgarriso@carroll.edu
Donna Greenwood, MSN, RN

Associate Professor, earned her masters at the University of Portland, specializing in primary care of the adult and family.

Special nursing interests include community and public health nursing, clinical decision-making, nursing ethics, and holistic care with emphasis on prevention and health promotion.

Other interests/hobbies include playing with her grandchildren Haley, Trey, Addison and Andrew; refinishing old furniture; sports - especially baseball; and anything outside, including hiking with her dog Gunner and camping.

Courses taught: Community Health Nursing & Nursing Leadership & Management. Favorite teaching/learning strategies include using video technology to bring in guest speakers from other countries and to create student nurse networks around the world.

Rm. 413 SH, Office phone: 447-5493; dgreenwo@carroll.edu

Janet Johnson, BA, RN

BA in Nursing from Carroll College, 1998.

Nursing Experience: 10 years working in VA medical centers in Helena, MT; Boston, MA; and Seattle, WA – specifically on medical/telemetry floors and in the ICU and CCU. Also served as a medical advisor at an International School in Shanghai, China. Served as Carroll's Lab Facilitator for 1.5 years before moving into her current role as Instructor and is working toward her master's in Nursing Education.

Nursing Interests: Nursing education, hospice, critical care, preventative care, and global health trends.

Special Interests: Traveling, watching movies (especially documentaries), any outdoor activities, cooking, spending time with my family.

Rm. 412 SH, Office phone: 447-4557; jmjohnson@carroll.edu

Meredith Krutar, MSN, FNP-BC

Assistant Professor, earned her Masters Degree in Nursing at Johns Hopkins University in Baltimore, Maryland and her Bachelor of Science in Nursing Degree at the University of Virginia, Charlottesville, Virginia. She is board certified as a Family Nurse Practitioner in primary care with an emphasis and love of pediatrics and women's health.

Other interests include playing tennis, traveling, cross-country skiing, enjoying the beautiful outdoors of Montana, and most importantly, spending time with her family.

Courses taught: Care of the Childbearing Family, Capstone

Rm. 408 SH, Office phone: 447-5494, mkrutar@carroll.edu
Karmen Williams, MSN, RN

Associate Professor and Chair of the Nursing Department, Karmen earned her Master’s in Nursing Education from Walden University and her Bachelor’s of Science in Nursing from the University of Wyoming.

Her diverse nursing background includes office nursing, nursing home, medical/surgical acute care and 20 years on a Women’s and Children’s unit which included labor & delivery, postpartum, nursery, pediatrics and the C-Section team. During this time, she was able to become the unit based educator for 2 years and thus started her excitement for academia. She had the privilege of teaching LPN and RN students for 16 years at Helena College University of Montana.

Karmen loves spending time with her two daughters and son-in-laws and her four grandchildren, golfing, reading, hiking, attending sporting events, and sewing.

Rm. 415 SH, Office phone: 447-5495, kwilliams@carroll.edu

Nursing Department Nursing Lab Facilitator:

Lea Chiavaras, MSN, APRN, GNP-BC

RN Lab Facilitator, Adjunct Faculty for the Nursing Critical Care Specialty Course

Lea started her career in healthcare as a nurse assistant in 2000. After graduating from Carroll College in 2005, she worked on a hematology/oncology and blood and marrow transplant floor at Mayo Clinic, Rochester. She then transitioned to work in the liver transplant/medical/surgical ICU at Mayo Clinic. In 2010, Lea graduated from the University of Minnesota, Twin Cities, with a MSN, and earned her Gerontological Nurse Practitioner’s license. She worked for several years in the Twin Cities before she and her family moved back to Helena, Montana.

Lea enjoys spending time with her husband and two children, traveling and any activity on or near mountain lakes.

Rm. 407 SH, Office phone: 447-5107, lchiavaras@carroll.edu
Nursing Department Administrative Specialist:

Terri John, BA

Terri provides administrative support for the Department of Nursing. Terri is an alumni of Carroll College (1985) whose special interests include qigong, creative writing, reading, hiking, nature, holistic health and spirituality.

She enjoys creating a more home-like and nurturing environment on the nursing floor. Stop by the nursing office for snacks, tea, and hugs!

Rm. 415B SH, Office phone: 447-5491; tjohn@carroll.edu
SECTION E

Academic Standards

E-1 Grading Policy
Carroll College  
Department of Nursing

GRADING POLICY

The nursing faculty believes that a professional nurse has a sound knowledge base, good communication skills, and competency in nursing practice. Graduates of the nursing program pursuing professional nurse licensure need to pass the NCLEX-RN licensure examination that uses a multiple-choice testing format.

In an effort to pursue this standard, faculty support the following nursing course evaluation strategy for courses in the department in which the majority of the grade is based on multiple-choice testing. In order to progress in the nursing program, the student must achieve 75% or more of the total points possible for the multiple-choice examinations in the course. If the examination average score is 75% or greater, final calculation of the numerical grade will include the other components, i.e. paper, project, group reports. For those nursing courses not using a multiple-choice examination format, students must also receive a minimum of 75% of the possible points to pass the course.

If the nursing course has a lab/clinical component, the student must receive a pass for the lab/clinical to progress in the nursing program.

The following grading scale has been adopted by the faculty for calculation of course grades.

GRADING SCALE OF THE NURSING DEPARTMENT:

A          94-100
A-        90-93
B+       88-89
B          85-
B-        83-84
C+       80-82
C          77-79
C-        75-76
D         68-74 (unable to progress in program)
F        Below 68 (unable to progress in program)

*Dress Code Policy*

Students are reminded to project a professional image to peers, clients, and staff in clinical settings. Safety and cleanliness are of paramount importance. Students in clinical areas represent both nursing as a profession and Carroll College.

It is the student’s responsibility to ensure that their scrubs with *Carroll College Nursing Department* are worn only by persons who are associated with the Carroll College Nursing Program. As the State Board of Nursing is very clear about how nurses identify themselves in practice, it is critical that all persons wearing Carroll College Nursing Department attire represent the program.

When students separate from the Carroll College Nursing Program for any reason, including but not limited to graduation, change of major, or withdrawal from the college, they must not donate clothing articles embroidered with *Carroll College Nursing Department* to second hand stores, sell in garage/yard sales, or give to friends/family who are not associated with the Carroll Nursing Program. If uniforms are in good condition and students wish to sell or donate their uniforms to an accepted nursing student or donate to the CC Nursing Department, this is acceptable.

The Carroll College Nursing Department has adopted the following dress code for nursing students in clinical areas. For these purposes lab is considered to be the same as clinical.

**PROFESSIONAL ATTIRE:** (when other than scrubs are required; refer to specific agency policies, also)

- Carroll College Name Badge
- Clean and unwrinkled dresses, skirts, pants, trousers, (blue jeans allowed per instructor discretion), shirts (no underwear type shirts)
- Socks or hose with street shoes

**Uniform Items** (for clinical at St. Peter’s Hospital, VA, nursing homes – unless instructed differently by nursing professor):

- Purple scrubs with embroidered Carroll logo – clean and unwrinkled
- Carroll College Name Badge/ID as required by clinical facility (Photo ID required at some agencies)
- Shoes that are clean, closed-toe, with good traction (no crocs or sandals)
- Stethoscope, watch with second hand (penlight optional)
- Handheld mobile device with appropriate software and/or apps
- Other assigned clinical areas, please see instructor for appropriate dress

**Personal Appearance**

- All long hair must be tied back away from the face or at the discretion of the clinical faculty
- Men must be clean-shaven or have neat, well-groomed beard/mustache
- No perfume, aftershave, cologne or scented lotion
- The odor of smoke or tobacco shall not be present on a student’s clothing or breath
- Short, unpolished, natural fingernails (no artificial nails)
- No studs, posts or rings in any visible piercing sites with the exception of maximum of two post or stud-type earrings in each ear
- Modest attire (no midriff visible or low-cut necklines)
- No visible tattoos
- No chewing of gum

*Modifications to the above at discretion of clinical faculty*

(*Revised May, 2016*)
CARROLL COLLEGE NURSING DEPARTMENT

Social Networking Policy

Any information gathered or obtained as part of the nursing student experience is bound by the same rules of confidentiality required by HIPAA, ANA Code of Ethics and the Montana Board of Nursing. For example, any conversation or identifying information concerning patients, peers, faculty, staff, agencies or communities on social networking sites (Facebook, YouTube, Myspace, etc.) is prohibited and may result in disciplinary action.

Advances in the capabilities of electronic media have increased the capacity to infringe upon human rights worldwide. The Carroll Nursing Program abides by the recommended guidelines of the National Council of State Boards of Nursing White Paper: A Nurses Guide to the Use of Social Media https://www.ncsbn.org/Social_Media.pdf

All students are expected to abide by these guidelines while engaged in any way with patients.* All students are encouraged to discuss with the Nursing Department faculty their plans for community service at home or abroad prior to the event/trip so that specific questions related to human rights, privacy and confidentiality can be addressed.

* For the purposes of interpreting the term “patient,” the Carroll College Nursing Department defines “patient” as “any recipient of health care services. A patient may be an individual, family, group, or community anywhere in the world.”

The White Paper: A Nurses Guide to the Use of Social Media provides the following guidelines:

How to Avoid Problems

It is important to recognize that instances of inappropriate use of social media can and do occur, but with awareness and caution, nurses can avoid inadvertently disclosing confidential or private information about patients. The following guidelines are intended to minimize the risks of using social media:

• First and foremost, nurses must recognize that they have an ethical and legal obligation to maintain patient privacy and confidentiality at all times.
• Nurses are strictly prohibited from transmitting by way of any electronic media any patient-related image. In addition, nurses are restricted from transmitting any information that may be reasonably anticipated to violate patient rights to confidentiality or privacy, or otherwise degrade or embarrass the patient.
• Do not share, post or otherwise disseminate any information, including images, about a patient or information gained in the nurse-patient relationship with anyone unless there is a patient care related need to disclose the information or other legal obligation to do so.
• Do not identify patients by name or post or publish information that may lead to the identification of a patient. Limiting access to postings through privacy settings is not sufficient to ensure privacy.
• Do not refer to patients in a disparaging manner, even if the patient is not identified.
• Do not take photos or videos of patients on personal devices, including cell phones. Follow employer policies for taking photographs or video of patients for treatment or other legitimate purposes using employer-provided devices.
• Maintain professional boundaries in the use of electronic media. Like in-person relationships, the nurse has the obligation to establish, communicate and enforce professional boundaries with patients in the online environment. Use caution when having online social contact with patients or former patients. Online contact with patients or former patients blurs the distinction between a professional and personal relationship. The fact that a patient may initiate contact with the nurse does not permit the nurse to engage in a personal relationship with the patient.

• Consult employer policies or an appropriate leader within the organization for guidance regarding work related postings.

• Promptly report any identified breach of confidentiality or privacy.

• Be aware of and comply with employer policies regarding use of employer-owned computers, cameras and other electronic devices and use of personal devices in the workplace.

• Do not make disparaging remarks about employers or co-workers. Do not make threatening, harassing, profane, obscene, sexually explicit, racially derogatory, homophobic or other offensive comments.

• Do not post content or otherwise speak on behalf of the employer unless authorized to do so and follow all applicable policies of the employer.

(5/3/16 reviewed)
Carroll College
Department of Nursing

Lab/Simulation Policies

Nursing Lab Guidelines

The nursing labs at Carroll College are considered clinical nursing sites. Proper behavior and attire are necessary to enhance the learning experience. Students have the responsibility to act in a professional manner at all times, showing respect for faculty, peers, mannequins/patient simulators, and the lab environment.

What is simulation?
Simulation is an attempt at replicating reality. In nursing education, simulation attempts to replicate some or nearly all of the essential aspects of a clinical situation so that the (healthcare issue) situation may be more readily understood and managed when it occurs in real clinical practice. Simulation is used as a teaching tool to help students refine their assessment skills. Simulation also provides a safe environment to develop critical thinking skills, clinical reasoning, clinical judgement and application of the nursing process.

Simulation Scenarios
Scenarios involve active participation of the students into the practice environment. Mannequins are used with respect and treated as if they were actual patients. The lab is a learning environment. Students involved in the scenario as well as student observers need to be focused on the scenario. A debriefing session provides the evaluation and a discussion of the learning objectives for the simulation and is a time to provide constructive comments for further enhancement of the simulation experience. Provide a safe, confidential learning environment for classmates. No discussion of the actions of fellow students should take place outside of the lab.

What is debriefing?
Debriefing is a structured time following a scenario that involves the immediate feedback and critical analysis of the simulation. It is a communication tool for the students participating in the exercise. The purpose is to provide active evaluation and focus on the positive aspects of the scenario, while also providing constructive feedback where improvement is needed. Debriefing allows time to answer questions and reinforce learning objectives.

Lab Guidelines:
Please follow these guidelines when using nursing labs and participating in simulation and scenarios:

- Sign in when using the labs for practice.
- Wear appropriate clinical attire as identified in course syllabus including Carroll College name badge.
- If you borrow a lab coat, hang it up when you are done with it.
- Wear closed-toed shoes.
- Use the alcohol gel hand sanitizer prior to any “hands on” activity with the mannequins or equipment.
- Eating is allowed only while seated at tables and with permission of instructor.
- Animals are not allowed in the nursing labs (Rooms 416, 417, 418).
- Children are not allowed in the nursing labs (Rooms 416, 417, 418).
- Only drinks with closed lids are allowed in labs.
- Do not use betadine, markers, or pens on the mannequins.
- Use only the provided lubricant if it is needed.
- Regard mannequins as actual people keeping in mind safety, infection, and HIPPA regulations.
- Demonstrate therapeutic communication as evidenced by introducing self, addressing the client professionally, active listening, and closed loop communication with team members.
- Utilize sound time management and prioritize care appropriately.
- Remain professional and confidential regarding the performance of other students.
- Come prepared for simulations including research notes and necessary equipment (e.g. stethoscopes).
- Do not use the equipment for any purpose other than specified.
- No invasive procedures are allowed in the labs.
- Report any malfunction or abuse to the lab facilitator.
- Maintain a safe working environment and know the “clean” needle stick guidelines and physical safety practices (e.g. lifting and turning) required to function safely in the lab.
- Work area must be left clean, organized and sanitized before leaving the lab.
- The mannequins and their environment must be left as follows: gown and bedding appropriately covering patient, bedding straightened, equipment put away or organized on bedside table, gloves and other trash discarded.
- Wash hands with soap and water when finished in the simulation lab.
- Faculty and staff have the right to remove students from simulation/lab experiences if the conduct code is violated.

(Revised 2/16)
Clinical Absence Policy

The profession of nursing requires commitment and responsible behavior. The Department of Nursing faculty records attendance for each clinical session. Excused clinical absences are granted only for personal illness, injury or illness, accident or death of a significant other. Students who anticipate missing clinical due to an official college function must consult with the clinical faculty at least two weeks in advance of the function to determine whether or not the absence is feasible.

All clinical absences must be reported to the clinical faculty, course coordinator and/or clinical site (as per faculty instructions) prior to the time for the clinical to begin. An unexcused absence may result in the failure or immediate withdrawal from the nursing course and/or major. Unusual circumstances related to the unexcused absence will be reviewed by the faculty on an individual basis.

The faculty may require written documentation from the student’s health care provider following an illness.

The faculty has the responsibility to ensure patient safety is not compromised. Therefore, any student unable to participate fully to provide safe and effective care to patients will be dismissed from the clinical experience and incur a clinical absence. Students, who are unprepared for a clinical/lab/agency experience, as determined by the faculty, will be sent home. This day will be considered an absence. The faculty reserves the right to send home any student deemed ill, physically or emotionally.

**If a student misses more than one excused clinical day, it may result in failure of the course or need to withdraw from the nursing course and/or major.**

If a student misses more than one excused clinical day, it may result in failure of the course or need to withdraw from the nursing course and/or major. It is the responsibility of the student to meet with faculty after being absent to determine if make-up is required, appropriate, or possible. The faculty reserves the right to determine whether or not makeup of missed clinical would be appropriate and necessary for a student to successfully achieve the objectives of a laboratory or clinical course. Note: Please also see the Carroll College Catalog and Carroll College Nursing Department Student Handbook regarding Access to Clinical Experiences.

Rescheduling a clinical experience may not be possible due to:

- clinical experiences are not able to be replicated at a time other than when they are scheduled
- the time into the semester, because faculty may be unable to schedule or design clinical make-up experiences during the second half of the semester
- the type of experience or scheduling with the faculty and/or agency are not available
- the clinical agencies’ schedules may be disrupted significantly by absences or extra clinical days due to student make up days

The faculty may work with the student to develop a simulation day that would be congruent with the hospital clinical day to ensure that the student receives the experience and content information from an excused clinical absence.

*(Revised 2/16)*
ACADEMIC POLICIES

Plagiarism Definition
Copying another student’s paper or any portion of it is plagiarism. Additionally, copying any portion of published material (e.g., books or journals) without adequately documenting the source is plagiarism. If FIVE or more words in sequence are taken from a source, those words must be placed in quotes and the source referenced with author’s name, date of publication and page number of publication. If the author’s IDEAS are rephrased, by transposing words or expressing the same idea using different words, the idea must be attributed to the author by proper referencing, giving the author’s name and date of publication. Authors whose words or ideas have been used in the preparation of the paper must be listed in the references cited at the end of the paper. (Refer to the Carroll College Student Handbook for additional information related to the Academic Integrity policy.)

Copyright-protected Materials Statement: (Jan. 2014)
All course materials for Carroll College courses are the exclusive property of the individual(s) who created them. It is illegal to share or sell any course materials you may obtain as a student in this class, whether on paper or in digital form. Unauthorized reproduction and distribution of Carroll College course materials may be grounds for disciplinary and/or legal action.

Disability Accommodation Statement
Please refer to the Carroll College Student Handbook to learn about Carroll’s policies and statements regarding learning disabilities.

Guidelines for Accommodating Students with Disabilities
The Carroll College nursing curriculum often requires physical demands, e.g., standing, sitting, walking, pushing and lifting, more strenuous than the usual activities of daily living. Present and past physical conditions may hinder one’s ability to perform these physical activities. In addition, the demands of decision-making and complex problem solving as a nursing student may produce challenges and stress beyond the usual of daily living.
The Nursing Department coordinates with Carroll College requirements for students to disclose a disability that might make meeting the essential elements of the nursing curriculum difficult. Disclosure of the disability to the Nursing Department must occur before admission or as soon as possible after learning of a disability, whichever is sooner, as well as the disclosure to the Academic Resource Center.

Once admitted to Carroll College, all students must be measured by the same academic standards. Regardless of disability and reasonable accommodation, a student must pass all courses at an acceptable level and master all essential clinical competencies.
**Guidelines for Assignments**
All assignments must be submitted on the due date. Late assignments will receive no credit unless arrangements for extenuating circumstances have been made with the faculty of the course prior to the due date and time. The faculty reserves the right to adjust the grading based upon the extenuating circumstances considered when accepting an assignment after the due date and time.

**Test Review**
Students are encouraged to learn from reviewing tests previously taken. In order to have this process be fair to both students and faculty, the following policy must be adhered to:

1. Tests will be reviewed only under supervision.
2. Review will be done by appointment or during designated class time.
3. It is acceptable to make brief notes while reviewing the test(s); however, exact reproduction of test items is prohibited.

**Test Taking**
The student is allowed to take only required materials to the testing room. Backpacks, books, food, drinks and all other personal belongings including caps/hats shall remain at the front of the class with the test proctor. Instructors are responsible for indicating what materials the student may have with him/her during the test.

**Attendance Policy**
The profession of nursing requires commitment and responsible behavior. For classes, the Nursing Department endorses the attendance criteria found in the Carroll College Catalog.

For clinical experiences, see Clinical Absence Policy.

It is the responsibility of the student to meet with faculty after being absent to determine if make-up is required and/or appropriate. The faculty reserves the right to determine whether or not makeup of missed classes would be appropriate and necessary for a student to successfully achieve the objectives of a laboratory or clinical course. Please see also the Carroll College Catalog and Carroll College Nursing Department Student Handbook regarding Access to Clinical Experiences.

* Clinical experiences include on-campus nursing laboratory and off-campus clinical assignments.

**Professionalism**
Student nurses at Carroll College are expected to conduct themselves in a professional manner in accordance with the guidelines established by the Carroll College Academic Integrity Policy, The American Nurses Association Code of Ethics for Nurses (2015) [http://www.nursingworld.org/codeofethics](http://www.nursingworld.org/codeofethics), and the Montana Board of Nursing. Carroll College nursing students are a reflection of both the nursing profession and Carroll College. As one of the most trusted professions, it is critical that nursing students interact with professors, peers and patients with professional behavior and communication. Components of professionalism include, but are not
limited to, the following:

- Adhering to Carroll College Nursing Department dress code
- Displaying professionalism while in class and at clinical rotations by treating all individuals with respect
- Respecting the time of others by being punctual to class, meetings and clinical sites
- Responding to emails, telephone calls, etc. in a timely manner
- Speaking with integrity when resolving conflict
- Acting as a role model for all nurses by displaying appropriate behavior in public
- Maintaining academic integrity
- Utilizing “above the line” learning to create a culture of accountability

**Electronic Communication Devices**

Use of cellular phones or any other electronic communication devices for any purpose during a clinical/lab, class or exam is prohibited by Carroll College Nursing Department, unless expressly permitted by the instructor. Use of electronic communication devices without permission from faculty may result in disciplinary action.

*(Approved by Faculty Association 9/02, amended 4/11, Nursing Association 5/16)*

**Nursing Department Student Success Plan**

The plan recommendations are as follows:

1. Our SUCCESS PLAN for students includes referring the following students to Kevin Hadduck in the ARC for academic support:
   - Students who receive less than a “C-” or <75% on the first exam of the semester.
   - Students who have an average exam grade of <80% at midterm.
   - Students who demonstrate a pattern of late or incomplete assignments.
   - Students who have a pattern of absenteeism from class.
   - Any student interested in receiving study tips and improving their academic performance.

2. The second part of our SUCCESS PLAN is to encourage students to seek assistance from the professors as soon as possible. Teaching is our passion and we really like to teach you and work with you. It brings us joy to see you understand and learn. Please let us help you be successful. Seek help from your professors early in the semester and as soon as you are feeling confused or overwhelmed.

3. We encourage you to seek support from the Wellness Center. If you are feeling overwhelmed or anxious about anything in your life (personal, academic, friends, family), please seek support from the counselors at the Wellness Center. Being able to openly talk about the pressure, anxiety, fears or frustrations will often assist you in processing these emotions in a healthy way so you can better concentrate on your academic performance.
Carroll College
Department of Nursing

Nursing Honors Thesis

POLICY: The Nursing Honors Thesis involves a research project developed with the assistance of a committee composed of a thesis director and two readers in collaboration with the department chair and the student’s faculty advisor. Undergraduate students with a cumulative 3.25 GPA at Carroll College are eligible to apply. Prior to commencing the thesis, the student will have completed MA 207 Statistics and NU 307 Evidence Based Practice or be concurrently enrolled unless another research course is approved by the Nursing Department Association. The student will enroll in NU 499 Honors Thesis.

RATIONALE: The Honors Thesis provides an opportunity for nursing students to develop their scholarly practice and prepare for the discipline of graduate study.

PROCEDURES: Read and follow the Carroll College Thesis Guidelines.

Demonstrate the steps of the research process:

- Develop a research question or a hypothesis.
- Complete the background for the project, review of the literature, and develop the methodology using APA format (Chapters I, II, and III).
- Receive Institutional Review Board (IRB) approval prior to commencing data collection.
- Commence and complete data collection.
- Complete data analysis.
- Identify the results of the research.
- Write a review of the results (Chapter IV).
- Discuss the findings and implications for nursing practice (Chapter V).
- Discuss the hypotheses or research question and identify research needs based on the results of the study.
- Prepare a presentation of the thesis and results for a professional forum or develop a poster presentation.

(Approved Nursing Association 12/15)
Carroll College
Department of Nursing

Discipline Policy

The Nursing Department expects that students, as potential members of the nursing profession, will behave in a reasonable and accountable manner when engaged in classroom and clinical learning. In addition to student conduct expectations specific to the Carroll Code of Student Conduct (found in the college student handbook), the following are examples of violations of student conduct which pertain to the Nursing Department:

1. Unsafe clinical practice (serious errors potentially affecting clients’ life or safety)
2. Inappropriate conduct (including but not limited to breach of patient confidentiality)
3. Unexcused clinical or lab absence* (for example, not calling instructor in advance, not showing up for clinical/lab, or missing clinical/lab for sports event or sports practice without prior approval from faculty).

*Two absences from clinical or lab may jeopardize student progression in the nursing major.

Procedures:

Issues involving misconduct will be guided by the College expectations for student conduct, found in the college handbook. The following assumptions and actions will guide nursing faculty response to issues of student misconduct:

1. The faculty involved will address the misconduct with the student as quickly and as effectively as possible.
2. Every effort will be made to maintain open lines of communication between involved faculty and student(s).
3. Faculty involved will document the alleged misconduct using the Disciplinary Action Form. A copy of the completed Disciplinary Action Form will be placed in the student file. (See form on next page)
4. All allegations of misconduct which could jeopardize student progression in the nursing major will be brought to the Chair of the department for discussion, advisement, and decision-making.

Potential consequences of student misconduct include:

1. A failing grade or mark of zero in a course, assignment, examination
2. Inability to progress and dismissal from the Nursing Program

Access to Clinical Statement

Clinical experience begins in the 200-level nursing courses and occurs in diverse community settings, varying from Helena’s hospitals to public health, assisted-living, long-term care, home visits, and psychiatric and school settings. Although nursing clinical is primarily in Helena, out of town clinical may be required, necessitating personal transportation. In addition, on-campus clinical experiences are provided in the on-campus nursing clinical simulation center. Each nursing course at Carroll provides quality, personalized learning experiences.

Nursing students are expected to purchase Carroll College nursing scrubs, nametag, hand-held mobile device, and other items needed for clinical/lab experience. As part of the application process and prior to beginning 200-level courses, nursing students must show proof of freedom from communicable tuberculosis and immunity to hepatitis B, varicella, and measles, mumps, and rubella (MMR). Students are required to have current American Heart Association Basic Life Support for Healthcare Providers certification prior to beginning clinical and must update this CPR certification as required. Students must update their TB test annually and obtain an annual flu vaccination as required.

Professional nursing is regulated in Montana by the Board of Nursing to protect the health, safety, and welfare of the public. The laws are designed to prevent incompetent persons from practicing the professions by establishing minimum standards to be met for licensure.

As part of their educational program, student nurses are entrusted with the responsibility of providing certain kinds of nursing care to clients/patients.

At Carroll College, all students are required to practice in accordance with the Statutes and Rules of Nursing for the State of Montana:

In addition to the legal standards of professional nursing practice, students must also adhere to the Code of Ethics of Nursing as established by the American Nurses Association.
http://www.nursingworld.org/codeofethics

It is the responsibility of the faculty to determine that the student nurse has demonstrated reasonable competence to render nursing interventions without risk to the client/patient. If the faculty member’s evaluation of the student nurse’s behavior or health status indicated that he or she is likely to provide unsafe nursing care as outlined in the course expectations, the Statutes and Rules of Nursing, and the ANA Code of Ethics, the faculty has the legal responsibility to deny the student nurse access to clinical learning experience. Professional liability insurance coverage is required for students engaged in clinical experiences and is included in registration fees.
**Insurance**

Students must be covered with liability insurance for all clinical courses, beginning with the first nursing laboratory course. Carroll College contracts with an insurance company to provide this coverage. The fee is included with the fees paid at the time of registration in the fall. It is a requirement of the College that all students have health insurance. For those students not already covered by a policy, health insurance must be purchased at the beginning of the semester.

**CPR Certification**

CPR certification including two-rescuer and use of masks and AED is required before starting clinical in the 200-level nursing courses. It is the responsibility of each student to obtain this certification; however, courses are offered periodically through the Nursing Department. Students are required to update CPR certification annually while enrolled in the nursing program. The American Heart Association Healthcare Provider course and Professional Rescuer’s course from the Red Cross are acceptable. Access to clinical is dependent on this certification.

*(Reviewed 5/16)*

**Student Criminal Background Checks**

**Policy:** The Department of Nursing requires submission of a criminal background check for all nursing students as part of the application to the nursing major and prior to entering 200-level nursing courses and placement in any clinical setting. Background checks are done at the student’s expense. Students with criminal background checks that reveal a record will be evaluated individually to determine whether they will be admitted to the nursing major.

**Rationale:** To promote patient safety and decrease institutional liability, many clinical agencies require students to have cleared a criminal background check before they will permit the students in the clinical setting. To meet these requirements, the Department of Nursing requires that the check be done as part of the nursing major admission process and prior to placement in any clinical agency.

**Procedure:**

1) Prospective students will be informed in college publications, web information and the nursing major application that a criminal background check will be required prior to beginning any clinical coursework. Information will also be provided regarding where students can obtain the necessary background check.

2) The background check will include statewide criminal records and residency history, as these are currently required by clinical agencies.

3) At the discretion of the department, additional checks may be requested. Any additional checks that may be required will be done at the student’s expense.

4) Students whose criminal background check reveals a record will be reviewed individually by the Department of Nursing to determine eligibility for placement. No student will be enrolled in a clinical nursing course with an unacceptable record revealed during the background check.

Student Name (please print):_______________________

To ensure the safety of the student and clients/patients and in compliance with the Montana Board of Nursing, each student needs to verify their immunization status. Applicants must complete this form to be considered for acceptance into the nursing program. **Immunization dates must be verified,** either at the Carroll College Student Wellness Center or by attaching proof (official documentation on letterhead of healthcare provider, school, or county immunization record). This form and any supporting documentation should be submitted with the nursing application.

Students accepted into the nursing major will have the opportunity to obtain CPR certification through the nursing lab in the fall semester prior to beginning clinical. Nursing students are required to have current American Heart Association Basic Life Support for Healthcare Providers certification.

While enrolled as a Nursing Major at Carroll College, students must update their TB test annually and obtain annual flu vaccination and updated CPR certification as required.

**Proof of immunity to certain communicable diseases:**

**Varicella (Chickenpox):** You must complete A, B or C:  
A) Year of Disease: ___________ or  
B) Dates of Vaccine (2 doses): 1_____ 2_____ or  
C) Date & Results of Titer: ____________________

**Hepatitis B:** (Students must have received at least the first dose of the Hepatitis B series at time of application and series must be completed prior to clinical experiences in fall semester)

**Hepatitis B:** Date of immunizations (1) ___________ (2) ___________ (3) ___________

Attach physician’s statement to this form if there is an exemption from Hepatitis B immunization.

**Measles (Rubeola), Mumps and Rubella (MMR):** Date of first immunization: ________________

Date of second immunization ________________

Attach physician’s statement to this form if there is an exemption from MMR immunization.

**Proof of freedom from communicable tuberculosis:** (must be completed within the past 12 months)

Date given: ____/__/_____ Date read: ____/__/_____

Result of intradermal test with purified protein derivative: _____________ mm of induration

Interpretation (based on mm of induration as well as risk factors): _____positive _____negative

If unable to have PPD, attach physician’s statement (must be dated within the past 12 months) or date and results of chest x-ray.

(if applicable) Verification by staff at Carroll College Student Wellness Center:

Signature: ____________________________ Date: ____________________________

* Nursing students in the 300- and 400-level must update TB test on annual basis.
Department of Nursing Policy on Prevention of Transmission of Communicable Diseases

It is the policy of Carroll College Nursing Department to require students of the school to comply with testing and immunization requirements conducive to breaking the chain of infection of communicable diseases if such tests or immunizations exist. Health care workers are at higher risk of contracting certain communicable diseases and can unwittingly transmit them to persons for whom they care. These recommendations are consistent with those of the American College of Physicians’ and the Center for Disease Control and Prevention recommendations for health care workers.

It is the responsibility of the student to submit to the Carroll College Health Center Nurse and the Nursing Department evidence of compliance with the items detailed below. The faculty of the Nursing Department shall ensure a nursing student has complied with the requirements before the student begins providing care to patients/clients/residents. Therefore, it is the policy of the Department to require the following:

**Hepatitis B immunity**
Students enrolling at Carroll College declaring their major as Nursing need to begin the Hepatitis B immunization series so it will be completed before starting sophomore nursing courses. It is recommended that, upon completion of the vaccine series, the student have serologic testing for anti-HBS done within 6 months of the final dose of the series.

The student may present proof of prior immunization and immunologic response to vaccine or disease by serologic testing for anti-HBs. A medical exemption from vaccination requires the signature of a physician licensed to practice medicine in Montana written within the past year. The signature should be affixed to a statement showing the date and reason for the exemption from Hepatitis B vaccination.

Students must submit documents in evidence of compliance with this policy to the Carroll College Health Center Nurse and the Nursing Department.

**Rubeola, Rubella, and Mumps Immunity**
Students enrolling at Carroll College declaring their major as Nursing need to show proof of immunity to rubeola, rubella and mumps before starting sophomore nursing courses. Immunity can be evidenced by documentation of immunization with two (2) doses of MMR vaccine given after the person’s first birthday and at least one month apart. Serologic evidence of disease must be presented for all three diseases if such evidence is presented in lieu of vaccination with MMR.

A medical exemption from vaccination requires the signature of a physician licensed to practice medicine in Montana written within the past year. The signature should be affixed to a statement showing the date and reason for the exemption from MMR vaccine.
Students must submit documents in evidence of compliance with this policy to the Carroll College Health Center Nurse and the Nursing Department.

**Varicella**
Students enrolling in Carroll College declaring their major as Nursing need to have documentation of month and year of reliable history of varicella infection, or serologic indications of infection, or date of varicella immunizations.

Students must submit documents in evidence of compliance with this policy to the Carroll College Health Center Nurse and the Nursing Department.

**Influenza**
It is strongly recommended that nursing students receive the current annual immunization for protection against influenza as is advised by the American Committee on Immunization Practices (ACIP). This immunization should be updated each year per the recommendations of the ACIP. Please note that some clinical sites may require influenza immunization.

**Freedom from Communicable Tuberculosis**
Students enrolling at Carroll College declaring their major as Nursing need to present evidence of their tuberculosis skin test status before starting sophomore nursing courses. Students having a known positive skin test to purified protein derivative (PPD) given by the Mantoux method, must have a dated statement of freedom from communicable disease with the signature of a physician licensed to practice medicine in Montana written within the past year. Students having a positive tuberculin test are to be evaluated for receipt of treatment for prevention of active disease and the statement from the physician should state the medical reason for exemption from such treatment if there is any. Each student must evidence freedom from communicable tuberculosis upon entrance into the Nursing major and annually thereafter.

Students must submit documents in evidence of compliance with this policy to the Carroll College Health Center Nurse and the Nursing Department.

*(Reviewed 5/16)*
Student Exposure to Hazardous Material Procedure

Student contact with clients/patients in healthcare settings is accompanied by risk of exposure to pathogens and other hazardous materials. In the event a student does become exposed to blood or body fluid of another person, the assumption must be made the blood or body fluid could be carrying pathogens, which would put the student at risk of contracting disease. The following are the minimum steps that must be taken by a Carroll College Nursing Department student who is splattered with body fluids, receives a wound from medical equipment contaminated with body fluids or is in any other way potentially exposed to pathogens/hazardous materials.

For the purposes of this policy, a hazard is defined as any substance, situation, or condition capable of doing harm to human health, property, or system function. A list of hazardous materials are maintained in the lab and updated yearly.

Objectives:
- To assure the safety of students and faculty with hazardous materials that are in use.
- To promote protection of the environment through the education of proper handling of hazardous material.

1. Immediately following an exposure to blood:
   a. Needle sticks and cuts should be washed with soap and water.
   b. Splashes to the nose, mouth, or skin should be flushed with water.
   c. Eyes should be irrigated with clean water, saline, or sterile irrigants.

2. Notify the instructor for the clinical experience as soon as possible after cleansing the exposed area.

3. Immediately seek medical advice from the provider of the student’s choice. For some types of exposure, post-exposure treatment would need to be started as soon as possible after the injury. Students may or may not be covered under worker’s compensation; costs of follow-up and costs of care are the responsibility of the student.

4. Review facility policies and procedures of the facility at which the incident occurred.

5. Complete a Carroll College Nursing Department Incident Report at the time of the injury or exposure or no later than 48 hours after the incident. The student should work with the clinical faculty who is the instructor at the time of the incident to complete the incident report. The incident report is filed in the Nursing Department in a file separate from the file of the student involved.

(Approved 12/14/00, Nursing Department Association 5/16)

Student Safety Policies

No Invasive Procedures Policy

Practicing invasive procedures for the sole purpose of learning the skill on fellow students, professors, or staff in the clinical agencies or designated Carroll labs is forbidden. The Faculty of the Nursing Department has determined that the risks outweigh the benefits of students or faculty practicing or receiving invasive procedures.

Student nurses may perform invasive procedures for therapeutic purposes if the procedure is performed under the defined policy and procedure of the designated clinical agency. Further, such invasive procedures shall only be performed under the direct supervision of a licensed nurse.

(Amended 11/16/09, reviewed 5/16)

Travel

Students are responsible for providing their own transportation to and from clinical facilities. Students may be required to travel in groups for field trips and community assignments. Students are not permitted to transport patients or clients in any vehicles.

Student Pregnancy

The Nursing Department at Carroll College is committed to the health and wellbeing of our pregnant students and their unborn children. A student who is pregnant may continue in the nursing program as long as her health status is satisfactory and she is able to meet the objectives of the course. Student pregnancy is to be reported to instructor(s) promptly to minimize risk to the fetus and the student. For the safety of the student, she may not enter where radioisotopes or x-ray therapy is being administered. In addition, it is the pregnant student’s responsibility to provide a written statement from her healthcare provider indicating that there is no known medical reason why she should not continue in the clinical or academic phases of the program. Clinical agencies may have policies that determine the placement of students during pregnancy and assignments will be made accordingly. Students who deliver during the semester must present a written official statement of health clearance from their healthcare provider permitting return to clinical activities.

(Reviewed 5/16)
Carroll College Department of Nursing

Policy for Student Withdrawal & Re-application/Re-entry to the Nursing Major

Students who leave the program must meet with the Department chair to clarify their status and may be asked to sign the Student Exit Form.

Re-application: Students who do not satisfactorily complete the 200-level nursing courses and who wish to be considered for re-admission, must submit their petition for re-application to the Chair of the nursing department by February 1. The criteria for re-admission for students who are still enrolled at Carroll College will reflect the protocol in place for the current pre-nursing applicants. The criteria for re-admission of students no longer enrolled at the college or who will have obtained post-baccalaureate status by the fall following their re-application, will reflect the protocol in place for external transfer students.

Re-entry: For students whose break in progression occurs after the first semester of nursing courses are completed, they must submit their petition for re-entry to the Chair of the nursing department by December 1 (for spring semester consideration) or May 1 (for fall semester consideration). See criteria for Progression in Nursing Major.

The nursing faculty will make a decision, on an individual basis, as to whether or not the student can re-apply or be re-admitted into the nursing major. This decision will be based on the petitioning student’s previous standing, plan for success, and the availability of space in the program, and may be in competition with other students.

Petition: Depending on the student’s individual situation, their petition for re-application or re-entry may need to include the following:

- A letter explaining the extenuating circumstances which contributed to the need for withdrawing and/or cause for failure or GPA falling below 2.75.
- A detailed plan describing how the student will prevent this situation from recurring.
- A letter signed by the student’s counselor or health care provider that attests to the ability of the student to be competent in meeting the expected learning outcomes of the nursing major.

If appropriate, the plan must specifically address what steps will be taken to be successful in this program.

Possible areas to consider addressing in the plan include:
1. Comply with recommendations of health care provider (if applicable)
2. Participate in counseling*
3. Utilize academic support resources on campus
4. Contract with a study partner
5. Focus on improving communication
6. Meet with advisor and instructors as needed

* If part of the plan for success includes participation in counseling, the student will need to sign a consent form so that the Nursing faculty can verify the student is following the plan for success. Consent will allow faculty to verify attendance only and not any content of counseling sessions.

(Revised 3/17)
Student Exit Form

Date: ________________

Name of Student: __________________________________

Current level in the nursing program:  200-level____  300-level _____ 400-level_____

Academic Advisor: _________________________________

Reason for exit:

I understand that by exiting the Nursing Department for whatever reason (change of major, no longer eligible to continue, health concerns, etc.), I relinquish my placement in the Carroll College nursing program. I am aware that there are no guarantees of future placement in the Carroll College nursing program.

__________________________________  ___________ _____________________
Student Signature                                         Nursing Chair Signature

(Approved 9/10, Reviewed 5/16)
Introduction
The Department of Nursing offers a baccalaureate nursing program preparing graduates, through the use of the nursing process, for the beginning generalized practice of professional nursing in a variety of community settings.
Whether caring for the acutely ill in hospitals or caring for people where they live or work, Carroll students are taught to use the nursing process, to involve the family in any care plan, and to utilize all resources in the community to help people achieve their highest level of functioning.
Students are taught skills which may be classified separately as cognitive, affective, and psychomotor. However, in most instances every nursing skill contains elements of all three types of skills.
Leadership skills, which are most apt to be classified within the cognitive and affective domains, are integrated throughout the nursing curriculum, and are specifically taught and practiced during the senior year.
The following, therefore, is a list of skills taught and evaluated by demonstration and supervised laboratory practice prior to assignment in a health care agency. Within the various health care agencies, students are supervised by both faculty and agency nursing staff as they practice the skills listed.

Student Skills Inventory

The Student Skills Inventory will provide students with evidence of current competence in those skills listed for applications to summer internships, job applications, nurse tech positions, etc. It is the students’ responsibility to keep this checklist current, with appropriate dates and signatures. This checklist will not be provided every semester, so students must keep it with their clinical materials. The checklist should be brought to clinical each day so that skills can be checked off by the nurse who is observing your technique and competency.
### STUDENT SKILLS INVENTORY - Faculty signature indicates the student has achieved an acceptable level of safety in performing this skill.

(Revised and adopted 10/15)
GENERAL DEPARTMENT GUIDELINES

Faculty

Faculty members post their schedule and office hours on their doors. If you would like to meet with a faculty member, please make an appointment with them directly (see Section D, Faculty & Staff Roster, for faculty phone extensions). Students accepted into the nursing program will be assigned a faculty advisor within the Nursing Department.

Department Administrative Support

The Nursing Department office hours are 9:00 a.m. – 4:00 p.m., M-F. Nursing Office is #415A, x5491 (447-5491). The administrative specialist manages the office and provides support to the faculty and students of the Nursing Department.

Copying

The administrative specialist is unable to do personal copying for students. There are copiers available for student use in various campus locations.

Children/Emergencies

If you have children in the school system or daycare, please make arrangements for an adult to be responsible for them while you are in school or clinical and make sure your child’s school or daycare has this person’s telephone number. The administrative specialist will make a reasonable attempt to locate the student in case of an emergency, but should not be used as the primary contact for schools or daycare providers.

Garbage

Please show respect for your fellow classmates by keeping classrooms free of garbage and food debris and cleaning up any spills or messes. If there is an event on the nursing floor and trashcans are full, please notify the administrative specialist or call Facilities at x5420 to pick up the garbage.

Checking out Department resources

If you need to check out lab equipment or other resources, please see administrative specialist or Lab Facilitator. You are responsible for the equipment while it is checked out to you.
Room Reservations

Regularly scheduled class or meeting times in classrooms and labs on the nursing floor are posted on signs outside the classroom doors. If you would like to schedule use of one of these rooms, please contact the administrative specialist to reserve the space.

Student Folders

Each nursing student who has been accepted into the nursing major (beginning with 200-level courses) will have a file folder in the mailbox drop system located on the nursing floor. If you do not have a folder, please let the administrative specialist know and a file will be made for you. These files are for students to pass messages to one another and for the faculty to communicate with you. Please do not place any sensitive or confidential material in the files. This is for light paper items only, please do not place any heavy objects in the paper files and check and empty your folder often.

Guidelines for use of Kitchen Area

There is a small kitchen area located to the right of the women’s bathroom on the nursing floor. Although it is a nursing faculty/staff break area, students are allowed to use the microwave (please cover food when heating) and refrigerator for short-term food storage. Please do not help yourself to the food stored in this area. You are welcome to enjoy the tea and snacks provided at the hospitality cart in the nursing office. The coffee pot and mugs in the break area are for faculty use only. Cups for student use on the nursing floor are available on the hospitality cart. Each person should clean up after themselves. Do not leave dirty dishes for someone else to clean. Please wash and rinse any cups and dishes you use and place on drain rack.
Holistic Health Lab & Learning Center
Guidelines

This room is dedicated to the learning and practice of holistic healing modalities, for self-care and enhancing the wellness of others.

We respectfully request your partnership in supporting the following guidelines:

☯ Treat others and the lab resources with care and respect
☯ Consider removing shoes prior to entering (*easier on carpet and furniture & aids in relaxation*)
☯ No food or drinks in lab (*water and herbal tea okay*)
☯ No cell phone use inside the lab
☯ Those who have scheduled room have priority (*room scheduling will occur through Nursing Department, administrative specialist*)
☯ Return all resources to their original location after use (*some resources can be checked out – see Nursing Department administrative specialist*)
☯ Please notify department administrative specialist for equipment or room maintenance needs

If these guidelines are not adhered to, more restrictive policies will be required, which may impact our mission.

We hope you find this space a valuable and integral part of your journey in becoming a professional nurse!
